:

THE LAST 12 MTHS have just flown and I can't believe it's time to catalogue bulls again. Market and seasonal conditions have changed remarkably during that time, and forecasting the future conditions we'll face will be just as perilous as it was forecasting them this time last year. So I won't try.

What doesn't change in the beef industry are your major profit drivers. Fertility, fertility and fertility.

We have a basic, commercially run cow herd where heifers calve at 20/24 mths and have to rebreed each year regardless of the challenges that they face. Cows are not allowed to drift from spring calving to autumn calving, as is a temptation in stud herds that calve twice yearly, and if they do strike a dud bull, as happened to a group of our cows 2 years ago, they have to work their way back into the season. This year we have added calving intervals for the mothers of each of the bulls to the catalogue to give an indication of their fertility.

The bulls will present off oats as per usual, however we did have to break into a silage pit back in late summer when summer rains failed to eventuate, and they were fed for 6 weeks until the March rain gave us some grass.

There are some different maturity patterns amongst the bulls to suit different production systems with all strong in carcase traits. The marbling potential of our herd continues to rise, however I still believe muscularity and yield are king and not just according to EBVs, but to the eye as well.

It would be our pleasure to show you the bulls at any time prior to sale, and we're also happy to show you our cow herd.

Regards,

Steve and Deh

Reids

NOTES TO BUYERS

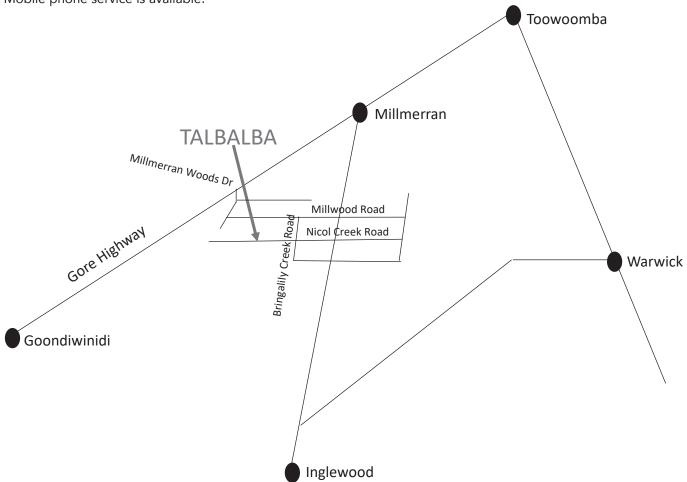

Directions: We are located at 1392 Nicol Creek Road, Bringalily, QLD.

From Millmerran head south towards Inglewood 25 km, turn right (West) at Nicol Ck Rd, continue 7km and Talbalba is on your right.

From Goondiwindi take Gore Highway head towards Millmerran 123 km, at Rifle Range turn right into Millmerran Woods Dr 1.5 km then left into Millwood Road 6.5 km, right into Bringalily Creek Rd 4 km, right into Nicol Ck Rd, 4 km and Talbalba is on your right.

Signs will be displayed on sale day.

Mobile phone service is available.

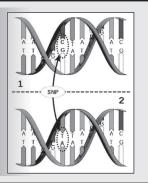

Inspection may be arranged prior to sale day by contacting the vendors or our agents. Visitors are always welcome. Inspection from 8am Sale day.

Delivery: Bulls will be delivered free to your door within 500km radius of "Delemere" or by prior arrangement with us. Please arrange Insurance for your purchase as all care will be taken but no responsibility.

Fertility: All bulls have been semen tested by Pittsworth Veterinary surgery on 26/06/2023 and Morphology tested by Dr Kym Kelly, Kelly Ag Morphology services, Dalby.

GENOMIC TESTING

All bulls have had DNA collected and a 100K, Low Density SNP produce by Neogen at Gatton.

This guarantees:

- Bulls with Genomics in traits observed (Breedplan) are sire verified and tested free of known genetic conditions.
- The accuracy of the EBVs will go to the next level with the addition of Genomic information.

Health: All bulls have been vaccinated for Tick fever Trivalent, 5 in 1, Pestivirus, B.E.F (3 day sickness) and Vibrio. We recommend purchasers continue these vaccination programs with a yearly booster. All bulls tested Pestivirus (P.I) negative by Neogen laboratory, University of Qld. No bulls have been hoof trimmed.

Vaccination / Treatment history	
5 in 1	2 doses 2022, booster 26/06/2023
Vibrio	10/05/2023 and 12/07/2023
Pestigard	10/05/2023 and 12/07/2023
B.E.F (3 day sickness)	2 doses 2022 and booster 12/07/2023
Tick fever trivalent B:222073	29/07/2022
Ivermectin backline drench	25/05/2023

Tick Fever note:

Lots 4 and 8 treated with Imidox on 13/08/2022 for severe reaction to Tick fever vaccine so no longer immune.

Horn Status	
Н	Horned Animal (All horned bulls have been dehorned)
H#	Horned animal with poll blood in first 6 generations
HPR	Herd Performance Recorded
Р	Polled
S	Poll animal with scurs (scurs have not been touched and usually are insignificant)

Poll Test: The Australian Poll Gene Marker test is available from the Animal Genetics Laboratory at the University of Queensland and Zoetis Animal Genetics. Hair, blood, tissue or semen samples can all be used to perform the test.

The results will describe the percentage chance of the most likely genotype. The genotypes that are reported are homozygous polled (PP), heterozygous polled (PH), and homozygous horned (HH). The accuracy of the test result is reported alongside the most likely genotype. The accuracy will range from 90% to 99%. If the test does not return an informative result, the accuracy is less than 90%, the result will be returned as Not Determined (ND).

Homozygous Polled bulls will dehorn all of their progeny irrespective of the mother's horn status.

Heterozygous Polled bulls dehorn 75% to 100% of their progeny when used over Poll cows depending on the % of homozygous cows. They dehorn 50% of their progeny when used over Horned cows.

Handling your new bull: Our bulls are run in groups of about 20 in open paddocks and are not used to being on their own. While this does ensure that they can compete and perform in the paddock, it can make them nervous when they are transported individually. If your bull doesn't settle after acclimatising into a new mob please let us know.

Rebate: A rebate of 3% of the purchase price will be allowed to outside agents introducing buyers in writing 24 hours prior to the sale and settling on their behalf within 7 days from date of sale. Outside agents attending the sale in person with buyers will be eligible for a \$200 expenses reimbursement.

Insurance: Insurance representatives will be in attendance. Cover can be arranged from the fall of the hammer. There is no vendor insurance on Sale bulls.

GST is to be added onto the purchase price at the fall of the auctioneer's hammer.

Buyer's Instructions: All buyer's instructions must be in writing and no verbal instructions will be accepted. A buyer's instruction slip is included in the catalogue for your convenience.

Refreshments: Our local Kindon branch of ICPA , Isolated Children's Parents' Association, will be catering Morning Tea and Lunch at this year's sale as a fundraising event. On completion of the sale please join us for complimentary drinks.

Safety: All persons enter the bull pens at their own risk. Children under 14 to be accompanied by an adult and must not enter bull pens. Bulls are generally quiet to handle but Sale day is stressful and may cause unpredictable behaviour.

Disclaimer: Whilst all due care is taken the owners, employees, agents and sales staff accept no liability for any accidents that may occur to persons or property on Sale day.

How to Register and Bid on AuctionsPlus

BREEDPLAN INFORMATION

Breedplan is a performance evaluation programme that describes the genetic merit of bulls for a number of commercially important traits. This genetic merit is given as an Estimated Breeding Value (EBV) for each trait. The EBVs in this catalogue are Hereford Group Breedplan EBVs and can be directly compared with Hereford Group Breedplan EBVs from other herds.

When comparing bulls, the EBV of each bull can be compared against the breed benchmark of zero (0), or against the current breed average EBV which are shown at the end of this entry.

Using EBVs to compare bulls:

CE DIR (%) – Calving ease direct EBV estimates the genetic difference in the ability of a sire's calf to be born unassisted from 2 yr old heifers. Higher, more positive calving ease direct EBV's are more favourable. Eg a bull with an EBV of +5.0% would be expected on average to produce 3% fewer difficult calvings from 2 yo heifers than a bull with -1.0% (6% difference between the sires then halved as the mother contributes the other half of the genetics).

CE DTRS (%) – Calving ease daughters EBV's are estimates of genetic differences in the ability of a sire's 2 yr old daughters to calve without assistance. Higher, more positive calving ease daughters EBV's are more favourable. For those with self replacing herds, selecting heifer bulls with above average CE DIR and CE DTRS is especially important, both for reducing calving problems in the current heifers and those in the future.

Gestation Length (Days) – Gestation length EBV's provide an estimate of genetic differences between animals in gestation length, and are expressed in days. Lower or more negative Gestation Length EBBV's are considered to be more favourable. Calves which have a shorter gestation length are generally smaller (lower birth weight) and thus the dam is able to deliver her calf with less difficulty. Note too short GL (small premature calves) may not survive.

Birth wt EBV – the lower the birthweight EBV, the lighter is the birthweight potential of the progeny.

200 day wt – indicates the relative weight advantage of a sire's progeny at 8-10 months of age.

400 day wt – indicates the relative weight advantage of a sire's progeny at yearling age. This EBV is important if selecting sires for the domestic/supermarket trade.

600 day wt – indicates the relative weight advantage of a sire's progeny beyond yearling age. This EBV is important if selecting sires to breed steers for the grainfed export markets.

Mature cow weight EBV (kg) – is based on the cow weight when the calf is weighed for weaning, adjusted to 5 yrs of age. This EBV is an estimate of the genetic difference in cow weight at 5 yrs of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd.

Milk EBV – reflects extra calf weight at weaning due to the genetic influence a sire has on his daughters milking and mothering ability.

Scrotal Size – bulls with positive (+) EBVs are expected to produce male progeny that are relatively more fertile and to produce female progeny that reach puberty earlier than will the progeny of negative (-) EBV bulls.

Days to Calving EBV (days) – are estimates of genetic differences between animals in the time from the start of the joining period (i.e. when the female is introduced to a bull) until subsequent calving. A negative EBV for days to calving indicates a shorter interval from bull in date to calving and therefore higher fertility.

Carcase weight (kg) – is based on abattoir carcase records and is an indicator of the genetic differences in carcase weight at 650 days.

EMA – bulls with positive (+) EBVs are expected to produce progeny with larger eye muscle area than progeny with negative (-) EBVs.

Fat Depth – bulls with negative (-) EBVs are expected to produce progeny that will be relatively leaner than will bulls with a positive (+) EBV.

Carcase Yield (RBY%) – bulls with positive EBVs for RBY% can be expected to produce progeny that are higher yielding @ 300kg HSCW than progeny from negative sires. Selection for this trait needs to be balanced with other growth and fertility traits.

Intra-muscular fat % (IMF%) – selection of bulls positive for IMF will improve marbling performance of their progeny. For a significant increase in marbling score, above average IMF sires need to be joined to above average IMF females.

Selection Indexes – Selection Indexes indicate the possible extra dollars earned per cow joined in self replacing herds targeting a particular market.

Northern Self-Replacing Index – Estimates the genetic differences between animals in net profitability per cow joined in a commercial self replacing herd targeting the domestic market.

This index is suitable for use by both straight bred Hereford herds and in cross breeding herds where Hereford bulls are being used over a Bos Indicus cow herd.

Daughters are retained for breeding.

Northern Baldy Terminal Index – Estimates the genetic difference between animals in net profitability per cow joined in a commercial crossbred herd using Hereford bulls over Bos Indicus females where all progeny are slaughtered.

Reference Sires

Days Horizon M028

Moderate maturity pattern bull with low birth weight, high calving ease and very short gestation length that we used over heifers. He is a trait leader for 200 day weight, scrotal and IMF. Horizon will increase herd fertility while improving carcase quality.

Allendale Gambler L143 Carcase improver who has a very high muscle EBV, strongly positive fats and high IMF. He is above average for growth, scrotal and milk. High seller at

Dubbo 2017.

Koanui Techno 3062 (PP) (IMP NZ) High growth NZ sire who excels in carcase, fertility and maternal traits. Trait leader for 200, 400, 600 day growth, milk, scrotal and marbling

Ravensdale Guardian M222 (P) \$32,000 sire owned with Calloway. Extra sound sire who excels in growth and carcase traits. Trait leader 200, 400, 600 day wts and scrotal.

Talbalba The Hoff M035 (P) Outstanding Victor son standing at Nowley. High calving ease sire who adds carcase and length. Top 1% muscle and yield.

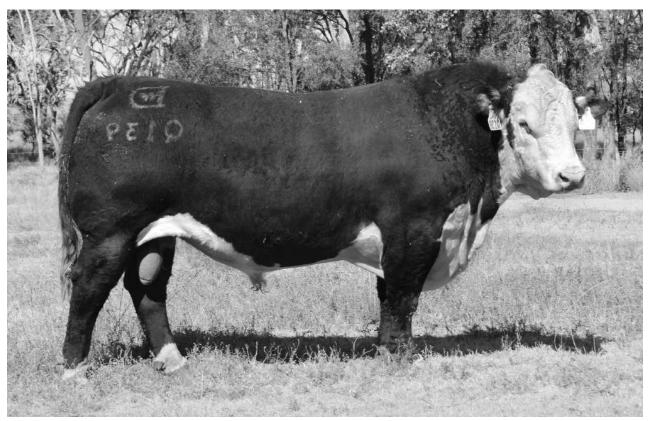

Tarcombe Fort N093 (P) Senior Champion Bull Wodonga 2019. Easy doing sire with sound structure.

Future Sires

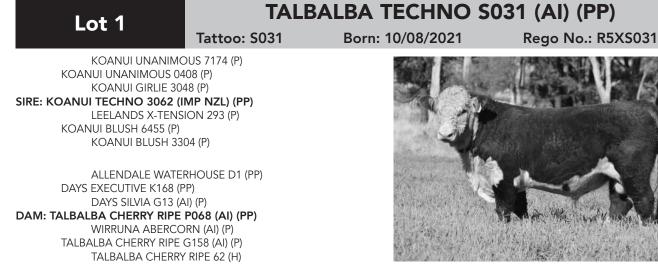

Colyer Guardian 1015 ET (P)

We are excited to add CGKB Guardian 1015 from the United States to our A.I sire battery. Guardian brings the power, performance, phenotype and carcase merit unmatched in the Hereford breed. 38kg birthweight and with no creep weighing 598kg at exactly 10 months. Dam is a full sister to Belle Heir. GKB Cattle recently purchased a ¼ share in this young sire for \$290,000.

Days Kingswood Q139 (PP)

Top price at Days Whiteface 2021 sale, purchased for \$40,000. A very muscular, correct structured bull that definitely exhibits his top 1% EMA figure. Kingswood has an outstanding well balanced data set with good phenotype. Sire of Lots 21 and 22.

Homozygous Poll. Used over cows last spring. Long, powerful Techno son oozing quality. Backed by an outstanding data set and one of our best Executive daughters who has had 3 calves with a 361 day interval.

QUEENSLAND LIVESTOCK AGENTS ASSOCIATION LIMITED STANDARD STUD STOCK - AUCTION TERMS AND ~ CONDITIONS OF SALE

IMPORTANT NOTICE

4

All bids shall be treated as offers made upon the following Terms and Conditions of Sale and all persons present are admitted to attend the sale on the basis that they have notice of these Terms and Conditions

- The highest bidder shall, subject to Condition 2, be the purchaser provided that the vendor reserves the right to bid either by himself or through his agent or auctioneer and should any dispute arise among the bidders for any lot, during or immediately after sale of the lot, it shall be settled at the 1. autoing the blocers for any lot, during or immediately after sale of the lot, it shall be settled at the autoineers absolute discretion who may, should one of the disputants advance, put the lot or lots up again. The bidding from time to time shall be regulated by the auctioneer and no bid shall be retracted.
- The sale will be conducted on a "Sale" or "No Sale" basis whereby the lot for sale shall be knocked 2. The sale will be conducted on a "Sale" or "No Sale" basis whereby the lot for sale shall be knocked down to the highest bidder, but the sale will be subject to the acceptance of the highest bid by the vendor who will immediately after the fall of the hammer declare "Sale" or "No Sale" Should the vendor reject the bid of the highest bidder such bidder will have the right of first refusal of the lot at the vendor's nominated price for one hour after the lot has been passed out of the ring on the Terms and Conditions herein set forth in so far as they shall apply. The details of the purchaser, the purchase price and the lot sold as recorded by the sale clerk for and on behalf of the auctioneer shall be equally binding on both purchaser and vendor. The auctioneer expressly reserves the right, without giving any reason therefore, to: (a). Befixe to acconsule date any bid.
- 3.

 - (a) Refuse to acknowledge any bid; (h)
- Withdraw any lot or lots before or during the sale: Exclude any person from the auction venue should it think fit.5. Each lot in all cases shall be at the risk and expense of the purchaser, upon acceptance of his bid by the vendor or upon acceptance of the highest bidder's offer by the vendor whichever shall be the earlier.
- acceptance of the highest bidder's ofter by the vendor whichever shall be the earlier. Except as expressly provided in these Terms and Conditions of Sale no guarantee or warranty shall be given in respect of any lot sold under these Conditions as to pedigree, sex, age, breeding condition or otherwise howsoever, and no guarantee, warranty or condition whatsoever shall be implied from any affirmation made before or at the time of the sale, or from any circumstances of the sale, but in all cases where a guarantee is intended the same shall attach and be enforceable only if reduced to writing before delivery of the lot and signed by the vendor or by the auctioneer acting as agent for the vendor, and the absence of such writing shall be conclusive evidence in case of disout that no nucreate warranty or condition whatsoever was oniven or implied 6.
- 7
- of dispute that no guarantee warranty or condition whatsoever was given or implied. In the event of any dispute in respect to the sale of any lot. (i) The purchaser shall nevertheless be obliged to pay to the auctioneer the full purchase price and any other moneys or interest payable by the purchaser in accordance with these terms and conditions;
 - The vendor and the purchaser shall resolve the dispute between themselve (ii)
 - The auctioneer shall have no liability or responsibility in regard to the dispute, and No lot shall be returned to the auctioneer and the purchaser shall indemnify the auctioneer for all costs, expenses and damages which the auctioneer is put to or incurs by reason of the
- purchaser so doing. The name of the vendor for whom the auctioneer acts is acknowledged to have been furnished to purchasers prior to sale and further particulars will nal cases be furnished to a purchaser if required ~ the case of any dispute the remedy of the purchaser shall be against the vendor only and in no 8
- case or under any circumstances against the auctioneer who is to be regarded for all intents and 9.
- ase or under any circumstances against the auctioneer who is to be regarded for all intents and purposes as agent for a disclosed principal. **PAYMENT** Unless prior credit arrangements have been made in writing with the auctioneer in the full purchase price for each lot shall be due and payable to the auctioneer in cash upon acceptance of the highest bid or the highest bidder's offer by the vendor and prior to delivery. Notwithstanding that delivery is given to or possession obtained by the purchaser or his representative prior to the payment of the purchase money in full the property in any lot which have been paid and liquidated, and until property shall pass, the purchaser shall hold such lot as bailee, provided that in all cases should such payment not have been made and liquidated within 14 days of the date of the sale the auctioneer reserves the right to: (i) Rescind the contract on behalf of the vendor and reposess and resell any lot; Rescind the contract on behalf of the vendor and repossess and resell any lot; (i)
 - Recover from the purchaser interest upon the purchase price at a rate per annum which aggregates the 90 day Bill Rate plus two percentum. For the purposes of this condition "the 90 day Bill Rate" is the rate published regularly in the Australian Financial Review, expressed as a percentage per annum. If at any time the Financial Review ceases to publish (ii)
 - a 90 day Bill Rate, the auctioneer shall determine and advise the purchaser of the interest rate to apply for the purpose of this condition. The auctioneer is selling as the del credere agent of the vendor and the full purchase price of any lot sold shall be payable by the purchaser to the auctioneer and be fully recoverable by the The auctioneer in its own name
- If the purchaser shall neglect or fail to comply with any of the within conditions, any lot purchased by him may be immediately resold by public auction or private contract, with or without notice, at the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of 10.
- 11.
- 12.
- the risk of the former purchaser, who will be held responsible for all loss and expenses arising out of such resale, and shall not participate in any profit accruing therefrom. Any vendor or purchaser removing the sale number from any lot after it has been sold will fully indemnify all affected parties for any loss, costs or damage should the lot be wrongly delivered. The purchasers, if more than one, shall be jointly and severally bound by these Terms and Conditions, and shall jointly and severally carry out and perform same. Any person who advances a bid on a lot shall do so on the expressed condition and understanding that should that persons's bid be the highest bid and such bid is accepted by the vendor, then that person my be acting on behalf of another party, either disclosed or undisclosed to the vendor or the auctioneer, provided however, that this Condition shall not in any way negate the vendor's right to faim against any principal and in such case the bidder's liability shall be construed to be by way of quarantee. 13. of guarantee.
- The auctioneer may, should it think fit, make arrangements on a purchaser's behalf for the feeding, watering, trucking, shipping of and general attendance to any lot after sale but no responsibility will be accepted by the auctioneer and all such services will be at the purchaser's risk and expense. No lot will be delivered until the sales invoice has been checked and signed by the purchaser or his 14.
- 15 duly authorised representative. 16
 - authorised representative.
